AIR FILTER, EXHAUST AND NOISE CONTROL PRODUCTS

- Gas Turbines **- Engines**
- Compressors **- Blowers**

Self-Cleaning Filters Improve Maintenance Cycles

Unit:	**(3) Solar Saturn Turbines**
Use:	**Pipeline – Compressor Station**
Location:	**Tennessee**
Requirements:	**Decrease required maintenance by extending life of air filter media.**

McGuffy Energy provided the MPC-24 (McGuffy Pulse Clean) for three of the client's Solar Saturn turbine units. These units use a reverse blast of air through the filter media to dislodge gathered particles which then fall to the ground, this extends the life of the filter media. McGuffy Energy also manufactured and installed the exhaust systems for this station.

PROVIDING SERVICE TO:

Pipeline **Power Generation**
Production **Petrochemical**
