Inline Silencers after Hydrostatic test

Inline Silencers installed at station

Inline Silencers for Gas Pipeline

Unit: TDS 30-156 Pipeline Inline Silencer
Use: Inline to the exiting 1,200# flow of the pipeline
Location: Pennsylvania
Requirements: Reduce noise levels in pipe yard

This project consisted of the design and fabrication of two inline silencers to reduce the high frequency noise of gas leaving the compressor building. By installing these three units and lagging the surrounding pipe, noise levels were reduced to a level meeting plant and neighborhood requirements. Silencers were ASME Certified for 1,200# working pressure. Shells were 2" thick.

PROVIDING SERVICES TO:

-Pipeline -Power Generation
-Production -Petrochemical
