KIUC 2009

Before
and After

Gas Turbine Enclosure Overhaul / Refurbish

This Project included removing and replacing/refurbishing the intake filter assembly, exhaust stack, control cabinet, auxiliary cabinet, turbine cabinet, exhaust silencers, intake filter housing, intake silencer duct, intake transition, intake plenum; in addition to removing the old cooling system and piping it to the new fin/fan Cooler system.

The dismantle of this unit was completed in two weeks

McGuffy designed and fabricated the filter housing and the exhaust stacks, which were shipped to Kauai to be installed.
