

GE Frame 5 Inlet Silencer and Ductwork and Exhaust Silencer and Stack

Inlet and Exhaust Systems For 200MW Peaking Plant

<p>Unit: Use: Location: Requirements:</p>	<p>(9) GE Frame 5 Gas Turbines Peaking Power Plant Louisiana Reduce noise levels in nar-by residential area</p>
--	--

Pictured above are the first two units of nine for a power producer at their Sterlington, LA Power plant. McGuffy Energy designed and built the inlet and exhaust systems, complete With supporting structures. These units are being installed without inlet air filters in view of Their intermittent operating schedules.
